Response to Amendment

The declaration filed on 12/19/08 by Mr Sengupta has overcome the rejections over the '614, '179, and '895 patents. However, a newly cited reference US 6,621,377 is being cited as basis for another 102(e) rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 7-11, and 24-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Osadchy (US 6,621,377). Osadchy discloses a method of making electronically tunable dielectric material. The method comprises of providing a layer comprised of tunable dielectric material with two metal oxides in the claimed amounts (See Col. 7, lines 5ff). As for the claimed sintering the mixed particles, it is deemed as being an inherent step done by Osadchy in order to ascertain that the tunable materials provide improved sintering characteristics as noted in Col. 8, lines 15ff.

As for claims 7-11, Col. 7, lines 19ff discloses the claimed weight ratios.

As for claim 11, see above noting BSTO, barium strontium titanate.

As for claims 24-25, see bridging paragraph of col. 7-8.
